Experience

Sep 2020 - PRESENT

Pineapple Studios Ltd, London - *Multiplayer programmer*

- Develop and maintain latency-free gameplay netcode for a mobile multiplayer shooter game
- Decide and integrate back-end technology to be used in mobile multiplayer shooter game
- Develop and host gameplay server and matchmaking server used for the game
- Build the game for QAs to test and fixing general bugs
- Help identify the cause of performance problems and find ways to optimize the game

Education

Sep 2017 - Jul 2020

SOUTH ESSEX COLLEGE, Southend-on-sea - *BSC COMPUTER GAME DESIGN*

The course taught me different areas of Game development by actually making different types of games for different platforms, types of games from multiplayer, single player to AR, platforms from PC to mobile.

Sep 2016 - Jul 2017

SOUTH ESSEX COLLEGE, Southend-on-sea - *ACCESS TO COMPUTING*

Throughout the course, I learnt the following topics and have a good understanding of them, from Computer Components ,Networking ,Programming, Web Development, Database design to Mathematics.

Projects

- Multiplayer top-down shooter game
- AR multiplayer game
- 3D and 2D single player RPG game
- Hyper casual mobile games
